MAPPINGMASTER
Fast PMS

With **FastPMS** connection with many Internet Distribution Systems starts directly at your property. These additional option integrates the Mapping Master software within your reservation system. That enables updates to be synchronised across all the different online and offline booking channels instantaneously and ensures all rates, availabilities and special offers are identical across all the different sites. Once a booking or amendment is made at any one site this information is instantly mirrored across all the other platforms. It will alleviate the worry of double bookings, human error and gives piece of mind. The FastPMS System is currently compatible with more than 40 reservation systems.

LIST OF COMPATIBLE SYSTEMS **Fast PMS**
